iBOP BINGO

intro bio oral presentations

reads text from notecards	reads long, boring methodology	gave volume instead of concentration	does not connect to lecture info	font too small or hard to read
reads text on slide *verbatim*	graphs have no axis labels	planted easy question for friend to ask	wrong format for Latin name	no authors listed on title slide
entire slide filled with words	units are wrong	I asked a question of speakers	data in massive table	no variance in data presented
no citations, including lab manual	talks too softly to be heard	fails to cite sources for images	reads title slide *verbatim*	talks too fast or too slowly
pays friend to clap after presentation	cites "human error" for results	no clear hypothesis explained	adjusts results to fit hypothesis	failed to use literature in presentation
